C̄ontinental⅂

Venkata Sridevi Akondi,

Thank you for your active contributions in the success of the HR OnBoarding App project and the synergistic partnership between Continental and UNC Charlotte Innovative Computing Projects program under Dr. Mohsen Dorodchi.

The Innovative Computing Project (ICP) partnership was a high-quality program with a lot of hard work and I would like to thank all who made it happen.

ICP Summation
Teams from the UNC-Charlotte College of Computing and Informatics partnered with Continental to work on a project that addressed a business need:

- The product owner unveiled their vision
- Teams brainstormed project direction and approach
- Groups broke the project into sprint with a burndown chart
- Feedback was provided to the product owner & steering team
- Team adapted their prototypes through rapid iteration
- Final prototypes were developed
- Groups provided a final presentation of their concept

In addition to Continental project work, the session provided a chance to network, demonstrate unseen skills and build a bridge between UNCC and Continental.

Without YOU, there wouldn't have been a project with such an awesome outcome.

Hopefully we have opened the door to possibility!

Thank you.

Respectfully,

David Devore, Wayne Pennell, & Maitrik Shaw
